Clarifications on how to complete some data in the PICA platform to apply for a PhD course

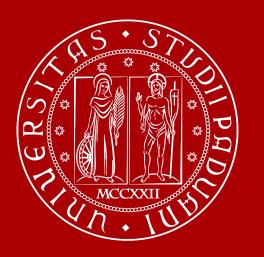

To apply for a PhD course at the University of Padua, it is necessary to present the submission through the "PICA" platform.

Information such as personal data, prior qualifications, preferences towards opportunities for accommodation, chosen PhD course, and other documents to be submitted with the application, should be provided by the candidate.

This is a tutorial to clarify any doubt on how to accurately provide this information, in some relevant sections, to successfully submit the application.

PhD COURSE: CURRICULUM AND SCHOLARSHIPS BOUND TO A SPECIFIC RESEARCH TOPIC

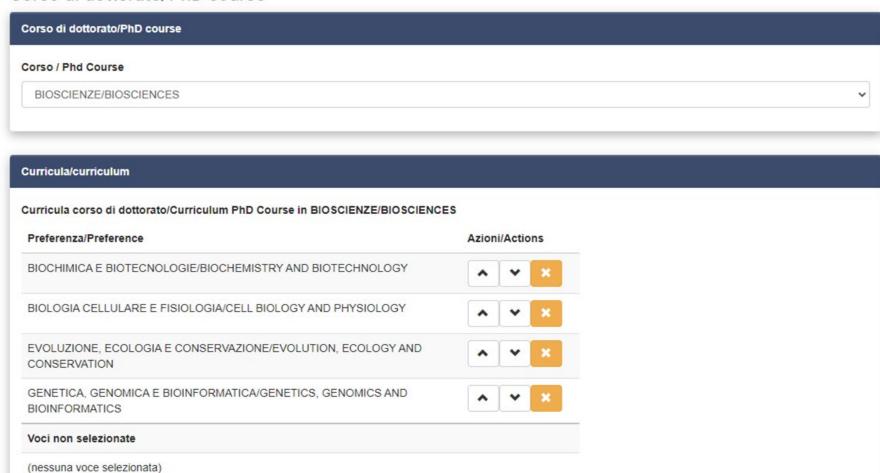

Regarding the PhD course you are applying for, you should consider that it may have **different curricula**.

If it is so, you should choose the preference order.

Please note that this is not binding, as the selection Committee chooses the most suitable candidates for each curriculum. Therefore, you may be selected for a different curriculum than the one you had indicated in the first place.

Corso di dottorato/PhD course

If you have chosen to apply for scholarships, and you would like to compete for places with scholarships bound to a specific research topic, you must indicate this in your application by selecting the relative subjects you're interested in.

This option, instead, is a binding priority choice, meaning that you expressly declare your interest in the topic/s you have selected.

This choice does not mean that you will necessarily carry out your research on this topic as it is the selection Committee which assigns the topics to the candidates. However, if you are assigned a topic in the final ranking, you will be bound to do your research on it.

Temi vincolati / Bound research topics

E' possibile selezionare gli eventuali temi vincolati per cui si vuole concorrere / It is possibile to select the eventual research themes for which you want to apply for
